

LOCATORS

RcareInc.com

Locator LT-490

Receives at 433.92Mhz from wireless transmitters and retransmits at 922 MHz to either a repeater (RP-990) and or master receiver (MR 500). Adjustable receive range for more granular locate capability.

Repeater RP-990

The repeater is designed to increase the reach of the locate system by increasing the distance between control and locators. It receives 922MHz signals from both LT-490 locators and RP-990 repeaters.

Master Receiver MR-500

Receives at 922 MHz signals from both locators (LT-490) and repeaters (RPN-990) and relays information via serial output to the R-care computer.

Heated and Cooled Enclosure WPE HC-1

14" x 12" x 6" heated/cooled NEMA4 locking latch enclosure. Includes: heater, fan, thermostats, strain relief, 2 bulkhead holes, screws and 2 power plugs. Durable polycarbonate for use with locators or repeaters in harsh outdoor environments such as parking lots, walk paths or golf courses.

Door Monitoring for Residential Safety

Remote Keypad RK-77

16 button backlit keypad with power conservation and tamper. Used in conjunction with door and window contact modules. Allows authorized use of monitored door. Power: 3 AAA batteries (included).

Door and Window Contact WD-3

Compact design for easy mounting on door frame. Includes tamper protection, low battery reporting, built in auxiliary input terminal. Built in Reed Switch and powerful magnet gives 30mm of space between door and switch. External contact can be used simultaneously. LED fault and test indicator. Power: 2 AA batteries (included).

Automated Check-in Motion Sensor MS-6

Infrared motion sensor for use with R-Care Check-in resident check-in system. Surface and corner mounting with tamper for removal. Low Battery reporting, 6 hour automatic power saver mechanism. Detection range 12 meters, insect and draft proof. LED fault and test indicator. Power: 2 AA batteries (included).

Bathroom Pull Cord BP-7R

Bathroom emergency pull cord mounts to a plastic single gang standard electrical box (not included) or ring. Locking call switch connected to a 6 ft. nylon cord. Re-transmit activation until reset. Reports reset and low battery condition. The only wireless pull cord with red LED call assurance indicator. Power: 2 AAA batteries (included).

Wall Mount Push Button Transmitter WM-8

Palm-sized design with large red button and call assurance LED. For use in common areas for alerts or as a remote reset button.

Universal Transmitter UT-3 & UT-3R

Connects closure transmits alarm. LED indicator for activation. Periodic transmission of alarm for power conservation. PCT/R provides automatic low battery warning and transmits restore signal.

Personal Transmitters

Wearable transmitter/Convertible WTC

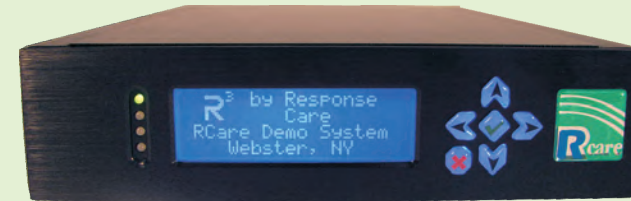

Can be worn as a pendant or convertible to a wristband. Permanently sealed, battery operated and water proof up to 20 ft. Low battery warning.

Nurse Call Adapter NC-66

Connects to existing hard-wired nurse call systems to provide wireless activation. Up to twenty (20) wearable transmitters can be programmed. Momentary and maintain contact. Battery backup.

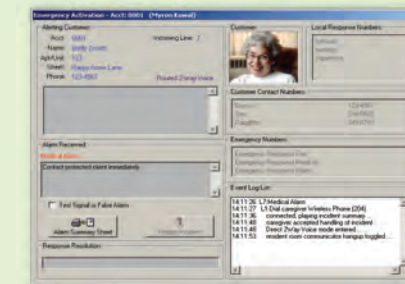

SYSTEMS AND SOFTWARE

- Browser Based Information Retrieval
- Hardware & Software in One Appliance
- Access From Anywhere, Anytime from Any Device

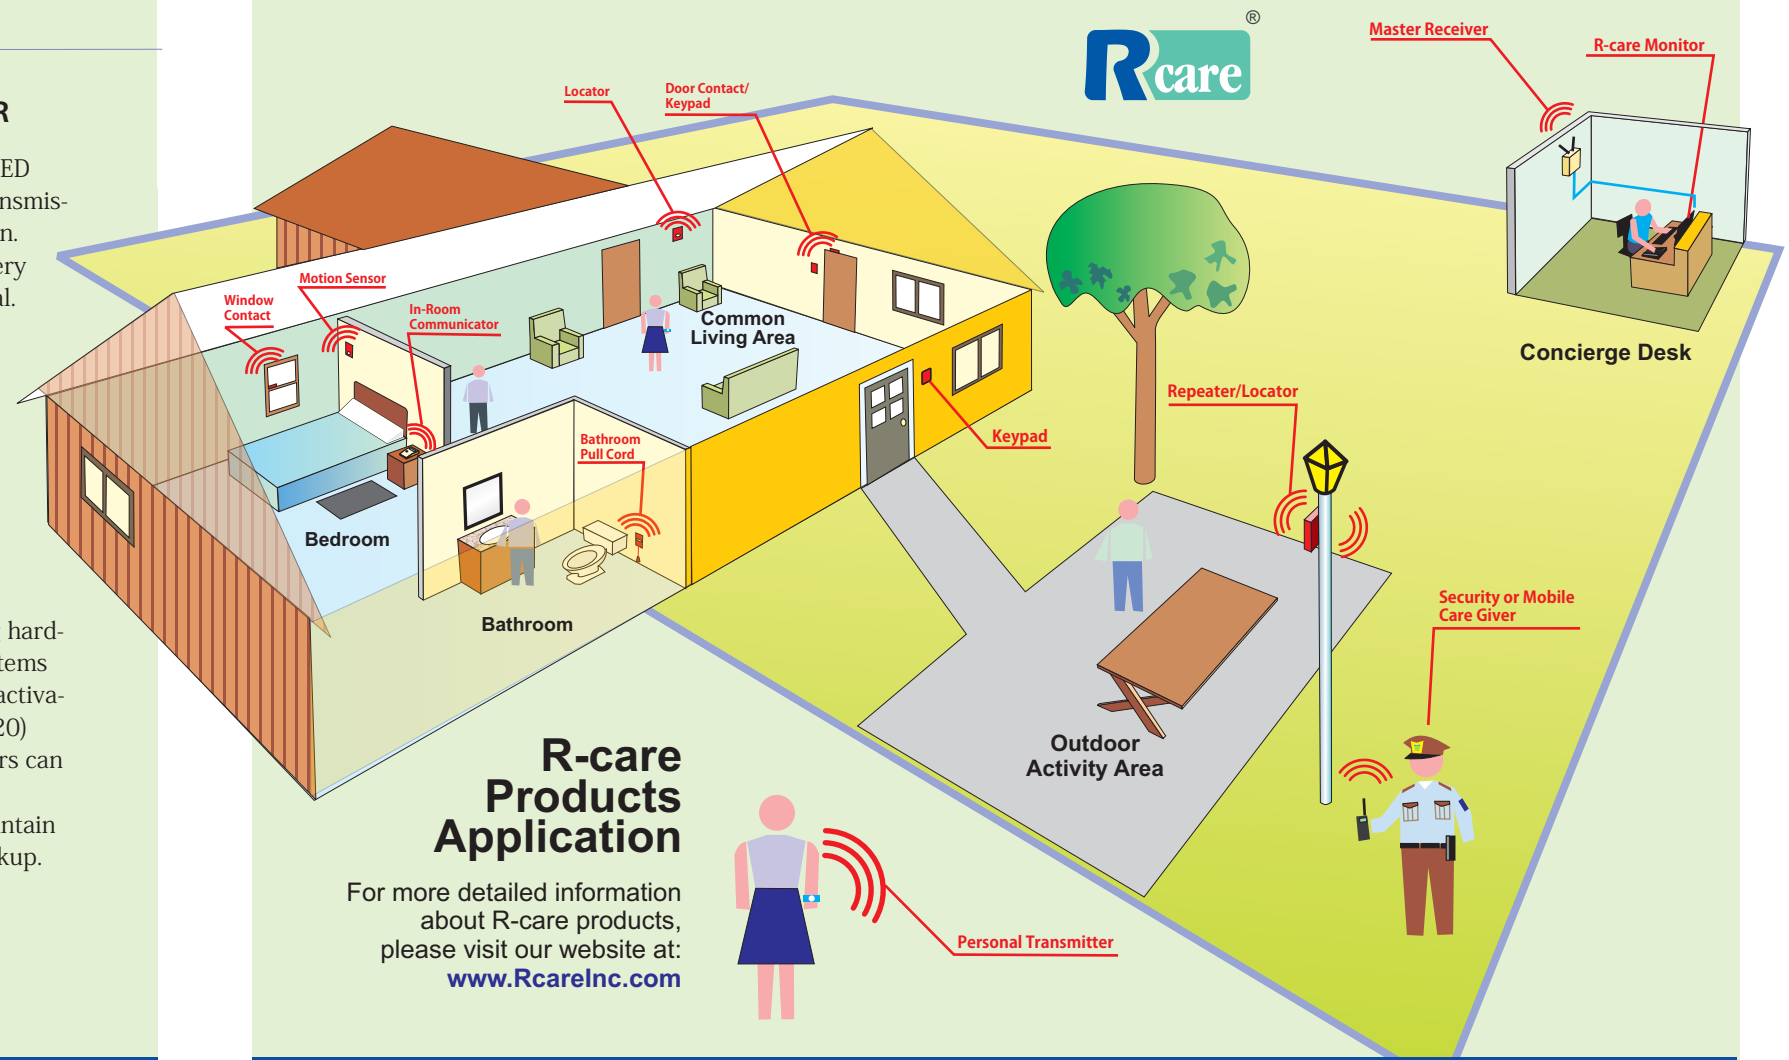

NEW, R-cube Monitoring System An Exponential Leap In Resident-Alert Communications

Real time, multipoint information retrieval is finally here! Receive resident alerts from any device, anytime, anywhere in your facility- It's communications to the third power. Browser based with hardware and software in one, self-contained unit, R-cube provides the ultimate in information retrieval capability and flexibility.

R-care Plus Software RC-PLUS VOICE TO VOICE

R-care PLUS, mission critical computer with intuitive user interface, the ability to deliver resident "alerts" and "voice to voice" to care givers facility wide with telephone and wireless telephone systems. Enhance the security of your facility by monitoring doors, windows, fixed location wireless or wireless pull cords, in "risk areas", as well as environment monitoring. Two-way voice in-room resident communicators utilize the same wearable transmitters that activate R-care Locator. Extensive logging and reporting of all incidents and can even record emergency conversations between staff and residents.
